

LETTER OF RECOMMENDATION

It is with great enthusiasm that I recommend **Aryan Bali** for admission to your Master's program. As Aryan's Faculty Advisor since he began his undergraduate studies in September 2021, I have had a unique vantage point from which to observe his consistent growth, academic dedication, and remarkable initiative over the past four years. I have seen him evolve into a mature and well-rounded individual who is exceptionally well-prepared for the rigours of a demanding international Master's program.

Academically, Aryan has always been a standout student. He has maintained an excellent record in our challenging Computer Science Engineering curriculum, culminating in a final result of First Class. He showed a clear aptitude and passion for artificial intelligence early on, which led him to pursue the AI & Machine Learning specialization. He consistently demonstrated a strong grasp of complex theoretical concepts, from Data Structures & Algorithms to Advanced Machine Learning, and a talent for applying them to practical problems.

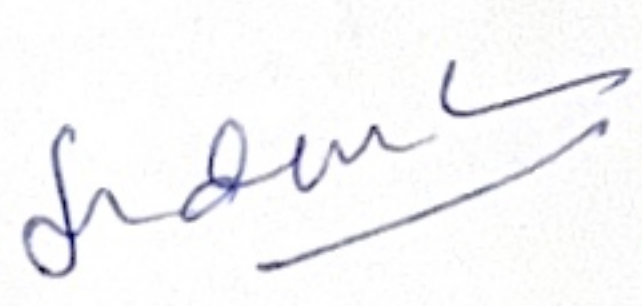

However, what truly distinguishes Aryan is his drive to apply his knowledge beyond the classroom. His deep involvement with the SRM Team Robocon since his first year is a testament to his passion for hands-on engineering. I was particularly impressed when he took on the leadership position of Corporate Domain Lead. In this role, he not only contributed to the team's technical success, achieving high national rankings, but he also demonstrated exceptional initiative by hosting two annual 'Solidworks Bootcamp' workshops to mentor other students. This commitment to both competition and mentorship is a rare and commendable quality.

On a personal level, Aryan is a proactive and mature individual. He is an excellent communicator and a natural collaborator, qualities I have observed in his team interactions and presentations. His decision to begin learning German in preparation for his studies in Europe further exemplifies his foresight and genuine commitment to succeeding in an international environment. He is an adaptable and resilient student who I am confident can thrive in a multi-country setting.

In conclusion, Aryan is one of the most promising and well-rounded students I have had the pleasure of advising. He combines strong academic fundamentals with proven leadership skills and a genuine passion for engineering. I recommend him without any reservations and am certain he will be a valuable and proactive member of your cohort.

Please feel free to contact me if you require any further information.

Sincerely,

Dr Sridevi Ponmalar
Assistant Professor
Department of Computational Intelligence
